EAE KNX Hotel-GRMS Solution provides maximum benefit and the best possible experience for users with a distinguished, elegant and modern design.

EAE's Hotel-GRMS Solution aims maximum safety for guests and investors, as well as provides saving energy thanks to the smart management of lighting, heating and cooling systems.

Products are based on the worldwide KNX standard and enable the system to be expanded with other KNX manufactured products.

EAE products were used in these projects.

■ İş Bankası Genel Merkez - İstanbul

■ Al Jawhara Tower - Jeddah

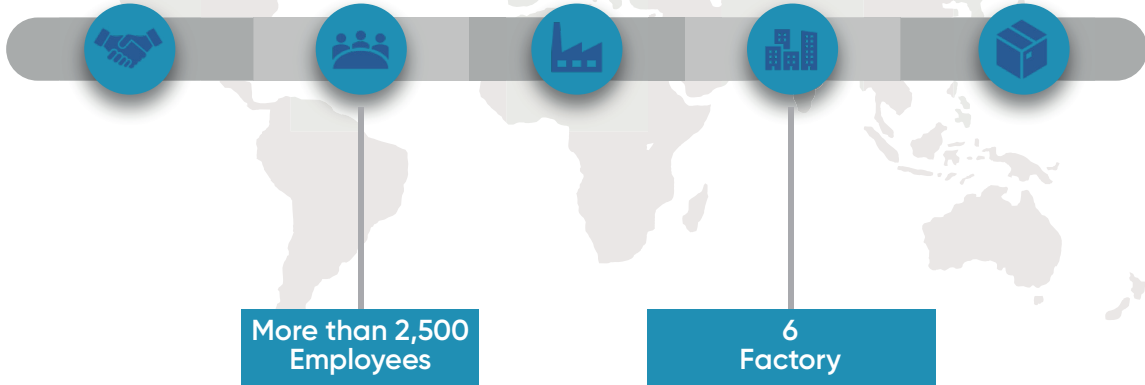

■ Allianz Arena - Munich

■ Jewel Twin Towers - Dubai

1973

EAE Hotel GRMS Solutions

All you need is EAE...

Every detail in a hotel should match the guest's expectations. The main purpose of EAE Hotel solution is to create a solution that meets all needs with comfort, aesthetics and elegance.

EAE Hotel Solution offers a complete view in a hotel for guests and staff with its technological, aesthetic and easy-to-use products.

- ✔ DND - MUR
- ✔ Card Holder
- ✔ Switch
- ✔ Thermostat
- ✔ Bedside Panels
- ✔ Welcome Panels

Comfort

Your guests will get used to comfort with scenarios that make life easier (such as sleep, movie, comfort mode).

- Lighting control
- Shutter / blind control
- Scene control
- Speaker control
- Heating / cooling unit control
- Easy communication with reception

Design

Combines elegance and aesthetics with user-friendly design.

- Aesthetic
- Initiative

Flexibility

Solutions can be developed according to your requests.

- %100 Configurable touch pads
- Different useage options to save energy

Integrations

- BMS Integration
- PMS Integration
- Door Lock System Integration

Integration into BMS Systems

The following platforms are easily integrated with EAE's KNX systems.

- BACnet
- Modbus
- OPC
- LonWorks
- M-Bus

Integration into PMS Systems

The following platforms are easily integrated with EAE's GRMS systems.

- Fidelio
- Opera
- OnQ
- Micros
- Many others...

Integration with Door Lock Systems

It provides the integration of all physical security needs into an energy efficient and easy to manage system.

All you need is EAE...

Mona consist of user friendly elegant glass design.
It is suitable to be a part of your design with various color
options.

Switches

You can reach all scenario types from a single point with user-friendly usage. Various switch alternatives from 1 button to 12 buttons.

DND MUR

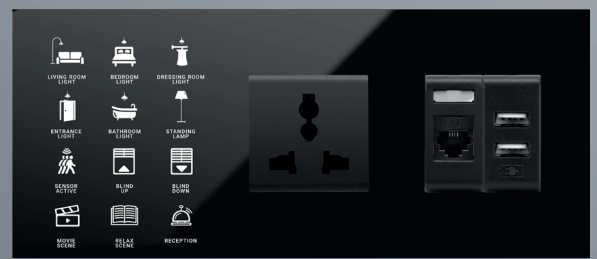

MONA DND MUR information display, where you can easily see whether your guests are in the room, consists of a 100% glass touch screen and includes room number, hotel logo, Laundry, DND, MUR and doorbell buttons.

Sockets & Switches

All the socket types you need, in one plate.

Thermostats

MONA thermostat offers a unique user experience with its touch design and minimalist icons, thermostats continue to add value to your space with frameless design.

Card Holders

MONA Card Holder makes the system able to turn off all electronic items that are left open when guests leave the room automatically.

Reads RF-ID Cards information in contactless.

DND MUR

The Mona series DND MUR display, where you can easily see whether your guests are in the room, consists of a glass touch screen and includes room number, hotel logo, Laundry, DND, MUR indicators and doorbell button.

Bedside Panel

Mona Serie offers %100 customizable, unique panels. You can create your own bedside panel through the configurator.

-  Touch operated
-  Icon options
-  Glass surface
-  Away, comfort, night and protection modes
-  Switch and Socket together
-  Independent programmable buttons
-  Frameless, minimalist design
-  Various color option
-  RGB LED option
-  Hundreds of different combinations.
-  Up to more than 5 combined monoblock modules
-  Double Press
-  Short Press
-  Tripple Press
-  Long Press

All the socket options you need in one.

Welcome Panel

When entering or leaving your room, desired scenarios can be realized with a single touch, and you can experience safety and comfort together thanks to the RF-ID card holder you use at the entrances.

You can combine switches and thermostats with your energy saver. Guests will control many things through one single monoblock panel.

-  Touch operated
-  Glass surface
-  Switch and Card Holder together

Technical Specifications

KNX Thermostat Side (up to 6 buttons)

- Temperature adjustment on display
- Integrated temperature sensor (°C/ °F)
- Fan speed adjustment (1, 2, 3, Auto)
- Different operation modes (Comfort, Night, Away, Protection)
- Fully automatic function mode (Heat - Cool transition)
- Control flexibility for all HVAC units including VRF-VRV and AC
- PI proportional, PI PWM, Hysteresis, Fan coil, Split unit controls

KNX Switch Side (up to 12 buttons)

Independent configuration for each button

- Switching
- Dimming
- Blind Control
- Value Transmitting
- Scene Control

KNX Card Holder Side (up to 6 buttons)

- Compatible with Mifare 13.56 MHz card
- Contactless reading for RFID Card information.
- Avoids mechanical wear and card deformation.
- Detection distance up to 50 mm

KMG103

KNX Modbus Gateway

General Specifications

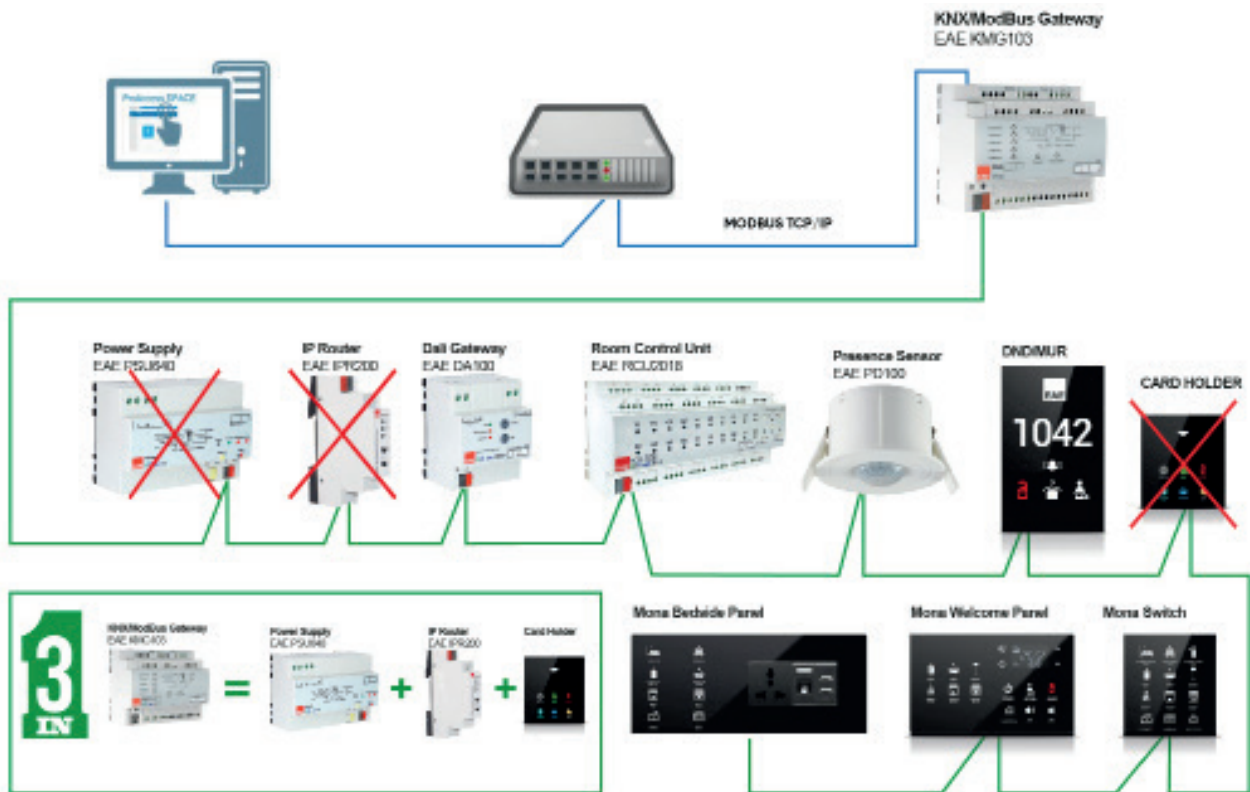

- EAE KMG103 can be used to control and monitor KNX installations via SCADA visualization software.
- IP address of device can be given by DHCP server or by manual configuration.
- EAE KMG103 includes patent-pending logic controller that enables room energy saver system without using card holder.
- Device has 3 physical inputs for door, window and presence sensing.
- EAE KMG103 has built-in 320mA or 640 mA KNX bus power supply for KNX devices. (110V, 220V AC are available)
- KNX Power supply output is short-circuit and overload protected.
- Power, overload and reset statuses are indicated with three different LED indicators.
- Power supply can be restarted by pressing reset button on the device.

Technical Information

KMG103

KNX Modbus Gateway
Up to 8 scene

KNX/Modbus Gateway Logic Function and Scenes

Pre - Welcome Scene

As soon as the guest enters the room, the desired lighting will turn on in pre-welcome scenario.

Welcome Scene

The use of lighting, HVAC, shading, sockets in the room is permitted as long as guests are in the room during welcome scenario.

Leave Scene

When guest left from the room, the leave scenario is activated at the end of the defined period

All lighting, sockets and air conditioning will be switched off.

If desired, the air conditioning state can be set to desired set temperature or mode state

Check in / Out Scene

After guests' check-in / out actions, desired scenarios can be activated with the integration of GRMS software and hotel PMS.

EAE TECHNOLOGY DOOR LOCK INTEGRATION SYSTEM

EAE door lock integration system is an online system that guarantees maximum security and the ability to remotely monitor the presence of staff and guests at any time.

EAE is the first and only KNX product manufacturer company has door lock integration with worldwide access control system brands like Assa Abloy and Dormakaba.

Every smart door locks has different set of features that makes them different from each other. EAE's Hotel-GRM System supports the varying and detailed requirements of Dormakaba and Vingcard brands resulting in powerful integrations. This is enabled through Assa Abloy's and Dormakaba's proprietary protocol, allowing the door lock to communicate efficiently into the network.

Certificates

EAE Technology products are and will always be in compliance with international open standards such as KNX, DALI, TCP/IP and WiFi.

KNX is the worldwide standard for home and building control. KNX offers at the same time the reliability of a consolidated system, market leader for over twenty years. (470 KNX Members, 8000 Products, 470 KNX Training Centers, 83000 KNX Partners, 190 Countries)

DALI (Digital Addressable Lighting Interface) is a protocol for digital lighting control that enables the easy installation of robust, scalable and flexible lighting networks.

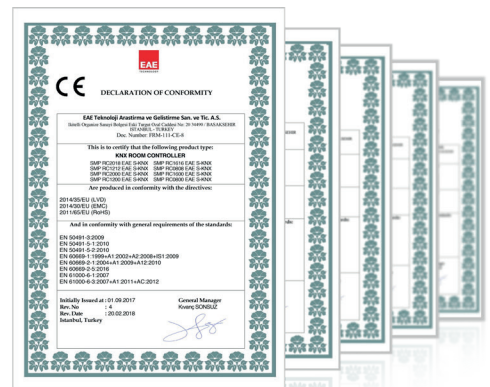

EU rules restricting the use of hazardous substances in electrical and electronic equipment to protect the environment and public health.

This standard is based on a number of quality management principles including a strong customer focus, the motivation and implication of top management, the process approach and continual improvement. These principles are explained in more detail in ISO's quality management principles.

The EAC certifications are issued by independent EAC certification bodies and their laboratories accredited by the relevant agencies of the five members of the EAC Economic Union: Russia, Belarus, Kazakhstan, Armenia and Kyrgyzstan.
